

Engineering-Driven Performance for Namibia's Mining and Heavy Industry Sectors

In mining and heavy industrial operations, unplanned downtime, reactive maintenance, hidden losses, rising costs, and overburdened teams create constant pressure on production and profitability.

Okuni Africa is your 100% Namibian-owned business performance partner.

We act as a trusted extension of your team, delivering managed technical support and practical on-site execution to protect production, reduce risk, improve reliability, and unlock better performance from your existing assets and people.

Ready to Protect Production and Reduce Operational Pressure?

Contact Okuni Africa today to discuss a complimentary asset performance assessment or tailored support for your operation.

We help you produce more, spend less, and reduce risk.

Who We Are

Okuni Africa is a 100% Namibian-owned engineering and technical services company supporting mines and heavy industrial operations.

We are not a traditional contractor or consultant. We are a **business performance partner** that works alongside your teams as an extension of their capacity. We provide managed technical support, practical site execution, and one clear point of accountability.

Our Approach

We start with your biggest pressures: unreliable assets, maintenance backlogs, commissioning risks, and stretched teams, then deliver structured, accountable support that strengthens (rather than replaces) your internal capability.

What Sets Us Apart

- ⚙ Client-first outcomes focused on business value
- ⚙ Commissioning readiness expertise for new mines, expansions, and ramp-ups
- ⚙ Full accountability from planning to handover
- ⚙ Deep local Namibian knowledge with practical industrial experience
- ⚙ Values-driven: Respect, Servant-Based Leadership, Purpose-Driven Passion, Ownership & Can-Do Execution, Lifelong Learning

The Bottom Line

We help mining and heavy industrial clients protect production, reduce operational pressure, and drive measurable improvements in reliability, efficiency, and profitability.

OKUNI AFRICA Where Passion Builds Progress

Our Services

Managed technical support that delivers real business results.

01 Shutdown Planning And Execution

Plan it right. Execute it on time. Get back to production faster.

Outcome: *Reduced downtime, improved shutdown performance, and higher production availability.*

02 Engineering-Based Maintenance

More than labour. Thinking maintenance.

Outcome: *The right people are doing the right work at the right time, with greater reliability and fewer reactive repairs.*

03 Reliability Engineering And Condition Monitoring

Predict failures before they happen.

Outcome: *Reduced failures, extended equipment life, and lower operational risk.*

04 Automation And Control Systems

Better visibility. Better control. Peace of mind.

Outcome: *Stable, efficient operations with actionable insights.*

05 Technical Project Coordination

Engineering-led oversight for capital projects.

Outcome: *Projects delivered as planned, on time, and within scope.*

06 Engineering-Based Spares Management

Buy the right spares, for the right reason, at the right cost.

Outcome: *Reduced stockholding costs and fewer delays.*

Start Here Complimentary Assessment

Most teams know they have challenges. Few know exactly where they are losing money or how to fix it most effectively.

Request your independent, engineer-led assessment of maintenance systems, asset condition, reliability risks, and high-impact opportunities.
